***Reasons for Allowance***

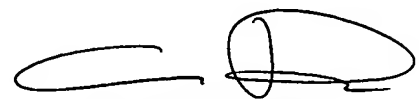

1. The following is an examiner's statement of reasons for allowance: The prior, Smith, U.S. Pat. No. 5796922 teaches provide ideal interpolation of the weights over the entire range of interest (see abstract, last 5 lines). The claimed invention teaches constructing a model by learning on the processed data in a modeling module, evaluating the fit and robustness of the obtained model in a performance analysis module, adjusting the model parameters to select the optimal model in an optimization module (see specification, section 0020). Smith fails to teach or suggest constructing a model by learning on the processed data in a modeling module, evaluating the fit and robustness of the obtained model in a performance analysis module, adjusting the model parameters to select the optimal model in an optimization module. Also, the claimed invention is statutory because the phrase "constructing a model by learning on the processed data in a modeling module, evaluating the fit and robustness of the obtained model in a performance analysis module, adjusting the model parameters to select the optimal model in an optimization module" presents an invention which is concrete, tangible and useful.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
